7" Flush-Mount Touchscreen Monitor

MYLBOX video intercom technology has taken video communication to the next level.

With stunning indoor touchscreen monitors and a complete range of outdoor units, you can answer calls however you prefer and wherever you are.

The 7" indoor touchscreen monitor controls access to doors and gates.

This exclusive flush-mount version integrates the screen into a sophisticated protective stainless steel frame; the monitor thus blends seamlessly into your home's wall, eliminating any protrusion for a clean, minimalist, and truly premium aesthetic.

The screen allows you to receive calls, open doors/gates, and store messages. It is designed for use with modular IP intercom systems. Whether you are at home or away, the MYLBOX modular intercom system is the ideal solution for you. It enables you to receive call notifications and alarm alerts from anywhere in the world via the Hik-Connect app for iOS or Android.

Features:

- Flush-mount installation: the stainless steel perimeter frame allows the screen to integrate seamlessly into the wall, minimizing visual bulk and offering a luxury design
- UI V2.0: intuitive design
- 7-inch color touchscreen with 1024x600 resolution
- Standard PoE
- Stores captured messages and images on the TF card
- Remote unlocking via the client software or mobile client
- View live video from door stations and connected cameras
- Supports Wi-Fi
