

Where architecture
Meets people

MYL
BOX

What does your entrance say about you?

The entrance is your calling card: the first contact you make to welcome those outside, the place where people and architecture meet.

Mylbox designs, manufactures, and markets outdoor postal systems for private homes or condominiums.

High-quality solutions, perfect for modern architecture and fully integrated into renovations; a perfect combination of technology, design, and reliability.

Why choose our products

CUSTOMIZATION

Whatever your entrance idea, Mylbox can make it happen, offering solutions based on your requests for shape, size, color, finish, and even name and street address.

TECHNOLOGY

2MP full HD wide-angle camera with fisheye lens and infrared night vision.

7-inch internal color display with IP or 2-wire technology and a 17 cm diagonal display.

Reliable and secure digital technology with excellent communication features.

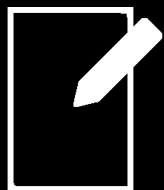

USER EXPERIENCE

Touchscreen with multilingual configuration.

Easy installation and programming for new construction, renovations, and existing homes.

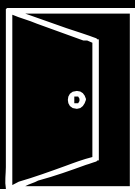

Why choose our products

DESIGN

Stainless steel body with a minimalist and linear design, with a choice of satin stainless steel, satin bronze, or RAL color. Logos, names, and house numbers can be engraved, inlaid, or contrasted with a matte gray finish for maximum customization.

EXPANDABLE SYSTEM

IP technology capable of integrating with other devices, IP cameras, and DVR/NVR recorders.

The ability to modify, expand, and adapt communication between doors and buildings even at a later date.

INTERFACES

Dedicated software for door-to-building communication control.

Remote system access via laptops. Smartphone with dedicated app for live interaction or burglar alarm activation.

MATERIAL: En 1.4301 / X5CrNi18-10 Stainless Steel
